DETAILED ACTION

1. This Office Action is the answer to the Election filed on April 10, 2002, which paper has been placed of record in the file.
2. Claims 19-31 are pending in this application.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 25-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding to claims 25-30, the preamble recites method claims but the body of the claims is written in means. Moreover, “the current bid”, “the limit maximum permitted” in step (f) are lack of antecedent basis.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3628

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 19-31 *insofar as they can be understood* are rejected under 35 U.S.C. 103(a) as being unpatentable over Huberman, U.S. Patent No. 5,826,244 in view of Official notice taken by Examiner.

Regarding to claim 19, Huberman discloses a purchasing agent method comprising the steps of: (see columns 3-18 and figures 3a-4b)

- (b) utilizing a user dialog to enter a product purchase request;
- (c) communicating with a first and/or next auction site;
- (d) determining if product purchase request is available, and if not, proceeding to step (c);
- (e) determining if the current bid from auction site is below the limit maximum permitted, and if not, proceeding to step (c);
- (f) placing a bid for product purchase request with auction site;
- (g) determining if bid has been accepted, and if so, canceling outstanding bids at other auction sites and terminating the purchasing procedure;
- (h) otherwise, determining if bidding has been terminated, and if so, proceeding to step (c);
- (I) determining if time is running out on any of the current outstanding bids, and if so, canceling all high-cost outstanding bids and returning to step (g); and

Art Unit: 3628

(j) otherwise, returning to step (c) to inquire if there are additional action sites in which it might be advantageous to place a bid on product purchase request.

Huberman does not disclose step (a) utilizing a user dialog to register at one or more auction sites to obtain a user identification and/or password. Official notice is taken that a user registers at one or more websites to obtain a user identification and/or password in order to establish a purchase transaction with the websites is old and well-known in the art. Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to include the features above with Huberman's for the security purpose.

Regarding to claim 20, Huberman further discloses wherein one or more of method steps is implemented using a personal computer (column 6, lines 5-20).

Regarding to claims 21-22, Huberman does not disclose product purchase requests are generated by a manufacturing resource and/or inventory planning system to supply parts and/or materials and/or supplies for a commercial enterprise. Official notice is taken that searching a manufacturing resource and/or inventory planning system for a product purchase request is old and well-known in the art. Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to include the features above with Huberman's for the purpose of providing the availability of the product requested to the user.

Regarding to claim 23, Huberman further discloses auction site is an Internet-based web auction site (column 5, lines 9-15).

Art Unit: 3628

Regarding to claim 24, Huberman further discloses step (f) prioritizes bid placement to permit only the lowest cost auction sites to be utilized in the bidding process (column 11, line 60-column 12, column 10).

Claims 20-30 are system claims that are parallel the limitations found in claims 1-7, 9, 10, 15, 18, as discussed above, therefore are rejected by the same rationale.

Claim 31 is written in computer software that are parallel the limitations found in claim 1 as discussed above, therefore are rejected by the same rationale.

Conclusion

7. Claims **1-31** are rejected.

8. The prior arts made of record and not relied upon is considered pertinent to applicant's disclosure:

Walker et al. (US 5,794,207) discloses a method and apparatus for effectuating bilateral buyer-driven commerce.

Conklin et al. (US 6,141,653) discloses a system for interactive multi variable negotiation over network.
